

## Seavus Project Viewer

The complete viewer for Microsoft® Project files

---

## Customers in the Services Industry

## Services

Service organizations across the globe are constantly required to effectively manage their IT costs. This is not an easy task given the global nature of business today. They need to provide their teams across the world with the ability to effectively and efficiently communicate project status. No easy feat in a global world. **Seavus Project Viewer** helps organizations to better manage this communication by facilitating the flow of accurate information about the status of every project in the organization – no matter where in the world team members may be located.
