# Chapter 1: Seavus Add-in for MS® Project

The Seavus Add-in for Microsoft® Project is a Project Manager's component from Seavus and it is distributed in a modern setup, built as an .EXE and .MSI (Microsoft® Installer) package. It provides a familiar setup wizard interface which guides you through the installation steps.

After you have downloaded the setup files, you can start the installation by double-clicking the *setup.exe* file in Windows Explorer or use the Run command from the Start menu.

**NOTE:** Before you start the setup, you should check if there is an existing installation of Microsoft® Project 2003 or 2007 on your computer.

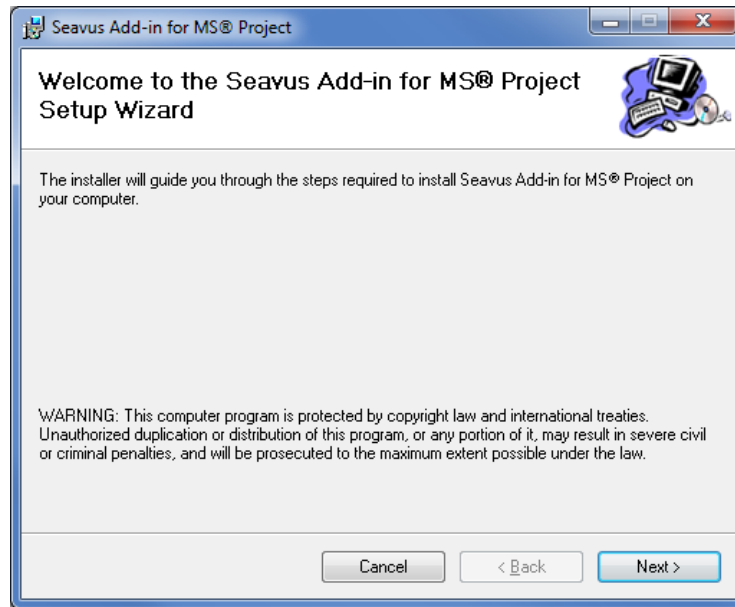

**IMPORTANT:** You must be logged as user with administrative privileges on your computer in order to be able to install the add-in.

This section provides step-by-step explanation of the installation procedure.

## Installing Seavus Add-in for MS® Project

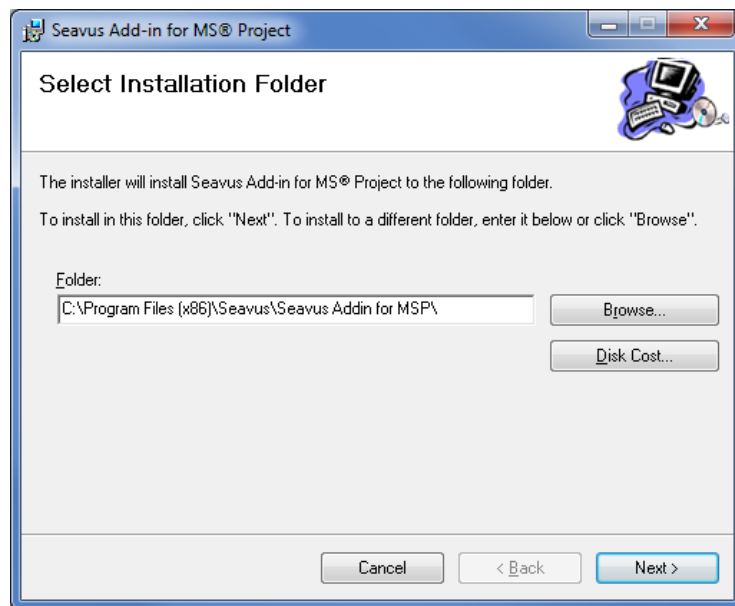

### Setup Welcome

After the initial preparations for installation, the setup wizard will show you the Welcome dialogue. You should click *Next* button if you want to continue with the Setup, or *Cancel* if you want to exit the wizard.

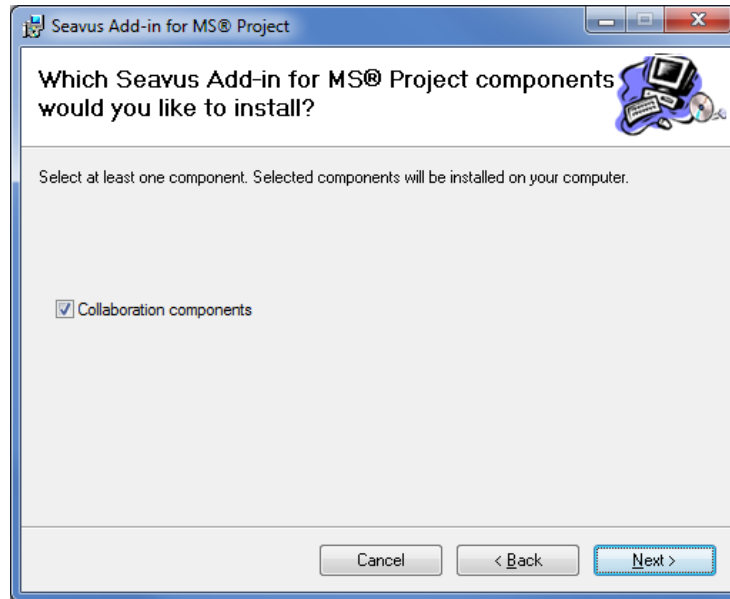

### Installation Folder

This dialog window gives you an opportunity to choose where the product will be installed and a preview of the available space on your hard drives. To check your available space on the hard drives click on the *Disk Cost* option. When you have finished with the settings click *Next* and the installation process will continue.

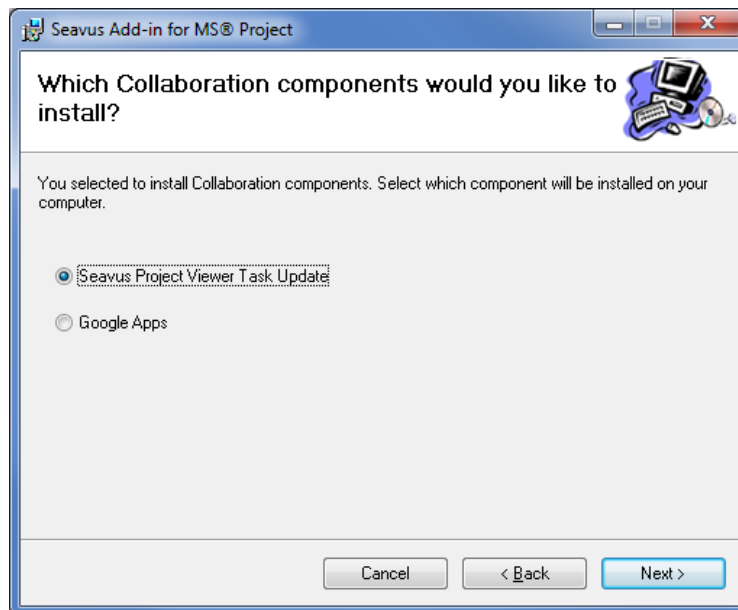

### Choose components

- Selecting the “Collaboration components” will enable you to choose the components needed for team collaboration on Microsoft project files.

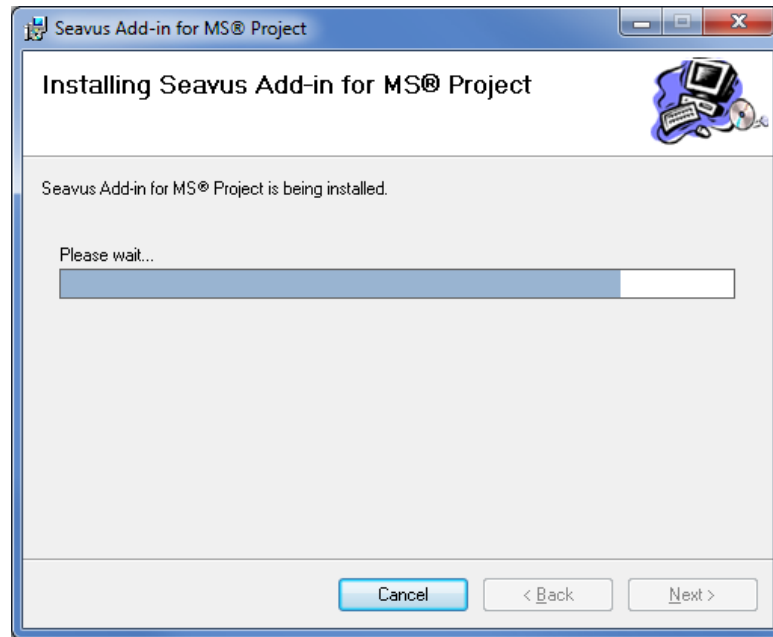

- Choosing the “Seavus Project Viewer Task Update” collaboration option will install the Seavus add-in for MS® Project with the components needed for Seavus Project Viewer Task Update collaboration method.
- Choosing the “Google Apps” collaboration option will install the Seavus add-in for MS® Project with the components needed for Google Apps collaboration method.

licking on the *Next* button will open the installation dialog.

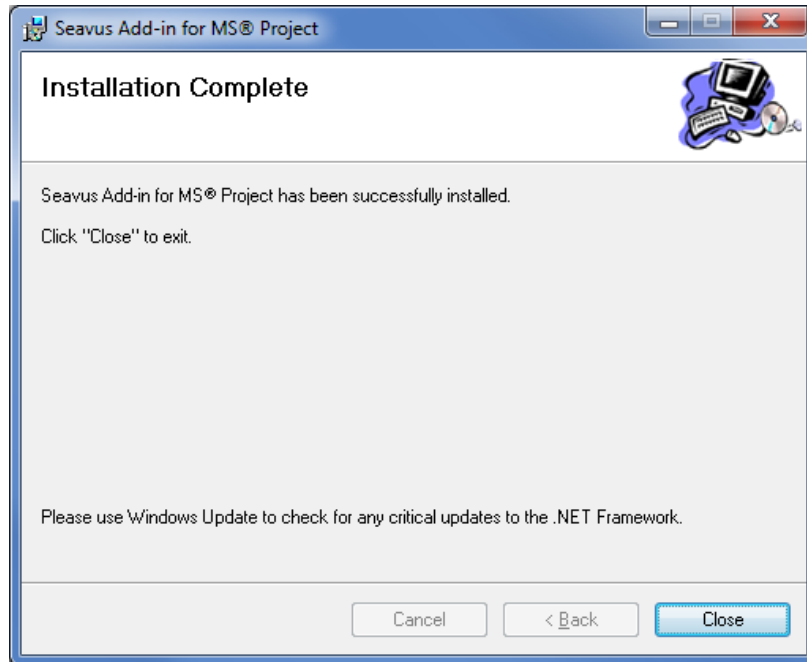

## Installing the add-in

After you have clicked the *Next* button, the installation of the Seavus Add-in for MS® Project will start. The dialog that indicates the status of the installation process will appear. If you want to stop the installation, you should click the *Cancel* button, and the setup will make a rollback which will remove all data from your computer that is related with the add-in.

## Setup Completed

If there was no problem with the installation, the last dialog from the installation wizard will appear, telling you that the add-in is successfully installed on your computer. By clicking the *Close* button, the installation wizard will be closed. After that you will be ready to use the add-in from within Microsoft Project.

**NOTE:** The setup reminds you to check for the latest updates to the .Net Framework since it is important for its proper functioning.

# Chapter 2: Installed Add-in toolbars

Depending of the selected components during the installation process you can get the following toolbar in MS® Project:

1. Import .SPP file

2. Seavus Project Viewer Task Update

3. Seavus Project Viewer Task Update with Import SPP File

4. Google Apps

5. Google Apps with Import SPP File

**NOTE:** You can read more about using the Seavus Add-in for MS® Project in the User Manual.

# Chapter 3: Uninstalling Seavus Add-in for MS® Project

To uninstall the Seavus Add-in for MS® Project from your computer, you should do the following:

1. Select *Control Panel* from *Settings* under the *Windows Start* menu.
2. When the *Control Panel* opens, double-click the *Add/Remove Programs* icon.
3. From the *Add/Remove Programs* dialog, select *Seavus Add-in for MS® Project*.
4. Click *Remove*.

Follow the directions in the wizard to uninstall the product.
