

SEAVUS Project Viewer

Seavus project Viewer is the single best software for viewing Microsoft® Project plans. It is a low-cost viewer for Microsoft® Project that allows users to open, view and print project plans (.mpp files) apart from Microsoft® Project.

Seavus Project Viewer, version 6.6, is the first viewer to give the project plans the same interface as Microsoft® Project, enabling the project team members to work with the Microsoft® Project Ribbons. This unique visual feature simplifies the work of team members because it makes the tool easier to learn and work with, and keeps the views of .mpp files between the project manager and team members identical.

Seavus Project Viewer provides the exclusivity of complete collaborative environment for project teams.

There are 2 ways you can use Seavus Project Viewer to collaborate with your team members:

- Via shared location if you want to keep your plans in house;
- Via Google Apps™ if you are already on the cloud and have a Google Premier Account

In both cases, team members report tasks' progress (Actual Work or % Completed) and the project managers accept or reject their updates.

Introducing the collaborative environment will let you:

- Get real time project status
- Continually evaluate team's performance
- Build knowledge for future projects

-  **Displays views, charts and tables as they appear in Microsoft® Project**
Seavus Project Viewer is the only viewer that fully replicates MS® Project views. This substantially decreases the learning curve and risks of possible misinterpretations while improving individual and team productivity.
-  **Provides the Microsoft® Project Ribbon interface**
Seavus Project Viewer is the only viewer on the market that brings the users the same Ribbon interface from MS® Project. The view of the project plan for team members is enriched with the ribbons that make the view same as in MS® Project, and by that soothes the work of the users.
-  **Includes feature for creating Custom Layer in Gantt chart view**
Using custom bars provided in the Gantt chart, team members can create Custom Layer of the Gantt chart view to respond to their needs and share that view with other team members. This is an exclusive feature that makes the work more colorful and more productive.
-  **Search within project files**
Seavus Project Viewer is the only project management tool that enables search within .mpp files. With Seavus Project Search users can also search .mpp files from Google Desktop Search as well as Windows Desktop Search.
-  **Opens very large project (.mpp) files**
Seavus Project Viewer opens large and complex project .mpp files in just a few seconds. This makes the Viewer especially useful tool for enterprises running large projects that last couple of years.
-  **Seavus Project Viewer in your language**
Available in 9 different languages: Dutch, Russian, Chinese Simplified, English, German, French, Spanish, Japanese and Czech. Seavus Project Viewer brings great simplicity to the project work by speaking your language.
-  **Worldwide customer support**
We are 100% committed to our customer's satisfaction. We dedicate ourselves to all your questions and issues so we can always answer them within 1 business day.
-  **More than 200 companies of Fortune 1000 use Seavus Project Viewer**
Companies such as BMW, Airbus, Michelin, Honda, Ford Motor Company, BP, Maersk Oil, Danske Bank, Burger King, Tetra Pak, IBM, DHL, Revlon, BBC Worldwide, SAP and thousands other have trusted us with their project management requirements.
